

Inline CSS → Tailwind Report

Project: wePassRedesign • Generated: 2026-07-01 • Reference only — no files changed

Summary: 25 inline-CSS occurrences across the codebase.

- 14 static — convert cleanly to Tailwind utilities.
- 11 dynamic (Δ) — use PHP runtime values `<?= $var ?>`; Tailwind's JIT can't see runtime values, so these should stay inline.

Exact palette matches: #94a3b8 = slate-400, #1e40af = blue-800. rgb(76,105,255) = #4C69FF (arbitrary).
